Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 1-4,7,8 and their dependents, concerning a display device characterized by different signal outputs.

Claims 5,6,9,10,11,13 and their dependents, concerning signal line connections of a display device.

Claims 12,14 and their dependents, concerning a display device with Off-signal and pulse signal characteristic.

Claims 212,213 and dependents, concerning a display device with output switch circuit interconnected with a sensor and display portion of the device.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic is the display device.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims

of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MEP. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
